CLEAN
CARPET
CAN BECOME
TIRED
WITH **AGE** 

AMC CARPET STEAM CLEANING SERVICES

DOES YOUR CARPET NEED THE NEXT LEVEL OF CLEAN?

While your company's carpets may look clean, ingrained dirt can build up over time, settling deep into the pile. This deep-down grime and dust will not only make your carpets look dull and smell musty, it can also shorten their lifespan and create a home for bacteria and pests.

AMC Specialist Steam Cleaning Service penetrates deep into the carpet's fibres, loosening stubborn dirt to leave your carpet looking fresh and revitalised. Combining high-pressure steam and powerful suction, your carpets will be visibly cleaner, smell fresh and be free of allergens and bacteria.

Whether your carpets have synthetic or natural fibres, AMC's steam cleaning is an eco-friendly approach to deep cleaning and reviving your company's carpets.

Our steam delivers a powerful clean

AMC's Steam Cleaning processes combine high-pressure steam and powerful suction to reach deep into your carpet's fibres to remove:

- dirt and grime
- stubborn stains and blemishes
- allergens such as dust mites, pet dander and pollen
- bacteria and germs
- odours

Gives your carpets a new lease of life

AMC's Steam Cleaning Service can revive the appearance of old carpets and restore their colour and texture. It will help maintain the condition of your carpet, removing the build-up of dirt that can cause premature wear.

A sense of pride

AMC Commercial Cleaning is committed to looking after people and the planet, which is why our Steam Cleaning Services require minimal chemicals to get ultimate results. Steam is effective on a wide range of carpets, including natural and synthetic fibres in a range of different applications. And while your carpets may be a little damp after steam cleaning, with proper ventilation you'll be able to resume your daily activities quickly.

WHY USE AMC'S CARPET STEAM CLEANING SERVICES?

1. Pre-Inspection

We'll meet with you to understand your business, your requirements and expectations for results.

2. Area preparation

We'll remove any obstacles from the areas to be shampooed to ensure a continuous clean. If any areas have been identified as needing special attention, such as main thoroughfares or stains, these will be spot-treated to remove heavy soiling.

3. Steam Cleaning Process

If necessary, we'll apply a pre-treatment to loosen stubborn dirt. We'll then carry out the steam extraction process to remove deep-down grime. This is followed by hot water extraction, which sanitises and disinfects the carpet, eliminating germs and bacteria. If required, we'll apply a deodoriser for additional freshness.

5. Post-clean Drying Process

We minimise drying time and moisture retention with specially designed fans. Then our team will assess the amount of moisture remaining in the carpet's fibres before replacing the furniture that has been moved.

6. Inspection

AMC Commercial Cleaning will do a walkthrough with you to ensure satisfaction and address any concerns.

7. Follow-up

Should you have any questions about the services carried out or have feedback on our performance, we're more than happy to chat with you.
