

EVEN

CLEAN

VINYL FLOORS

CAN LOSE

THEIR SHINE

⌚ OVER TIME

DOES YOUR VINYL FLOOR NEED THE **NEXT LEVEL OF CLEAN?**

A new vinyl floor is stunning; shiny, smooth and attractive. But over time, with plenty of foot traffic and activity, it can lose its sheen. As dirt and grime begin to build up, it can be easier for moisture, mould and bacteria to get trapped, making the floor slippery and a risk for accidents and illness.

AMC's Specialist Strip and Seal process removes the old existing sealer and puts on a new coat, removing hazards and returning the vinyl to its former beauty.

- Makes the surface easier to clean
- Improves the floor's lifespan
- Protects against surface damage and abrasion
- Reduces the trapping of moisture and bacteria

Long lasting protection

AMC's Strip and Seal Services will apply a premium floor sealer for the protection and enhancement of this asset. Your floor will be protected from constant foot and trolley traffic, dirt and grime from spillages, which without effective protection can cause dulling of the floor surface and make it dangerous to walk on.

It's good for your floor

Flooring isn't cheap, so it pays to slow the progress of wear and tear. Regular Strip and Seal Services will improve your vinyl floor's lifespan and help it stay looking like new.

A sense of pride

Well-maintained vinyl flooring shows people you have pride in your organisation and care about the details. Clean floors are a foundation for a feeling of cleanliness throughout your organisation and can make a good impression on new customers and team members.

WHY USE AMC'S VINYL STRIP AND SEAL SERVICES?

AMC STRIP AND SEAL - OUR PROCESS

1. Pre-Inspection

We'll meet with you to understand your business, your requirements and expectations for results. Our team will assess the condition of your vinyl flooring and identify existing sealants.

2. Area preparation

We'll remove any obstacles and protect all adjacent surfaces and furnishings with drop cloths and protective coverings.

3. Stripping

We will apply a premium-grade stripping solution to remove the existing surface. Using gentle agitation we will remove any build-up, then remove the dissolved sealant along with dirt and debris.

4. Cleaning

Remove all residue with clean water and neutralise the floor surface to prepare for sealing. Carefully dry the floor prior to sealing.

5. Sealing

We will apply a high-quality vinyl sealant evenly across the area and inspect the surface to ensure the sealant is applied uniformly.

6. Finishing

The applications of optional treatments are available for enhanced durability and gloss. A thorough inspection of the sealed floor is carried out to detect any imperfections. We will then polish the floor to the desired appearance.

6. Inspection

AMC Commercial Cleaning will do a walkthrough with you to ensure satisfaction and address any concerns.

7. Follow-up

Should you have any questions about the services carried out or have feedback on our performance, we're more than happy to chat with you.
